

AF10-CP

Cement Anti-Foam

AF10-CP is a powdered anti-foam agent that can significantly reduce the amount of foaming in cement slurries thus avoiding problems associated with reduced densities and pump cavitation.

AF10-CP is effective in all classes of cement.

Features and Benefits

- ✓ Powdered additive for accurate addition either on the fly or batch mixed
- ✓ Very effective at low concentrations
- ✓ Not affected by sodium chloride or naphthalene sulphonate
- ✓ Decreased clumping compared to competing products

Applications

- ✓ Broad range anti-foam additive for any type of cement slurry
- ✓ Applied at 0.1 to 0.5%
- ✓ Applicable in all cement blend types
