

SCV11-HSS

H₂S Scavenger

SCV11-HSS is a unique H₂S Scavenger that is cost effective, environmentally friendly and highly efficient. The product finds use in sour liquids, gasses, tank atmospheres, pipelines, flow liners, storage tanks, tank trucks, vacuum trucks and geological formations.

SCV11-HSS is not a Triazine product and contains NO Formaldehyde.

Features and Benefits

- ✓ Biodegradable, fast acting and has virtually no odor
- ✓ Fully compatible with water, methanol, glycols or mixtures
- ✓ SCV11-HSS also kills the bacteria that is the source of H₂S
- ✓ Temperature tested to 210°C, and 41 kPa for 16 hours and showed no signs of degradation or solid precipitates
- ✓ SCV11-HSS can be added to make up water for producing steam and the produced steam will effectively eliminate H₂S from tank atmospheres or other atmospheres to which the steam is introduced
- ✓ Removes Mercaptans from fluids and gases

Applications

- ✓ SCV11-HSS can be used in production flowlines, pipelines, and downhole
- ✓ The scavenger can also be used in testers P-Tanks, storage tanks, vessels, H₂S scrubbers
- ✓ Can be added to ponds to remove iron sulfides
- ✓ In general, 1 liter of SCV11-HSS in 1000 liters of fluid will neutralize approximately 1000 ppm H₂S

Quality Products. Quality Service. Quality Solutions.
